

1099 PRO

1099 Pro.NET

Securely manage your data from anywhere in the world.

Imagine...

- Accessing your 1099 data directly via Internet Explorer (6.0 or higher), Chrome, Firefox or Safari
- Onboarding your CSR's in under 5 minutes to lookup & print forms
- No software to install at your desk

The screenshot displays the 1099 Pro.NET web interface. On the left, there's a sidebar with 'Current Filer: 1099 Pro Service 96-4185342 1099', a 'Select Filer' button, 'Tax Year: 2009-2013', 'Tax Form: 1099-MISC', and a 'Forms and Printing' menu with options like 'Browse, Enter & Edit', 'Form Lookup', 'Recipient Lookup', and 'Track Form Print Jobs...'. The main area is divided into sections: 'Select Form Type:' with a grid of checkboxes for various form types (e.g., 1042-S, 1099-K, 480.7C); 'Select Search Field:' with dropdowns for Recipient TIN, Account, Last Name/Company, First Name, PCode, and Tax Year; 'Select Operator:' with dropdowns for 'Begins With' and 'Equal'; and 'Enter Search Criteria:' with input fields for values like '40852200' and '2012'. There are also 'Search' and 'Clear' buttons on the right.

1099 Pro.NET Features

- Form lookup over multiple tax years, companies and form types* (see above)
- Easy manual entry to enter new or modify/correct existing forms
- Security profiles to limit what users can see or do
- TIN/Name Verification in real time
- Print Bin to see all print jobs
- Reports & Custom exports of data*
- TIN Management*
- Optional lock down of FWT, SWT & LWT tax fields
- Custom Queries & Column View
- 'LITE' switch limits software functionality to make it easier to onboard new users.
- Email encrypted 1099 PDF's from within your browser
