

Norton Antivirus

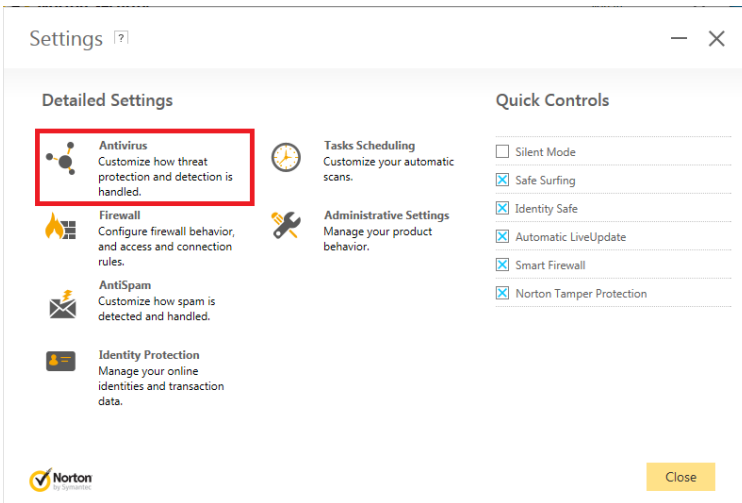

Purpose: Doing this will allow 1099Pro Enterprise or Professional to install and/or update without any interference from the anti-virus software.

To bypass the scanning of 1099Pro Enterprise, Professional, 1042-S, W-2 Pro, 8966 Pro and Corporate Suite (**Note:** This assumes that the software is installed in the default installation locations)

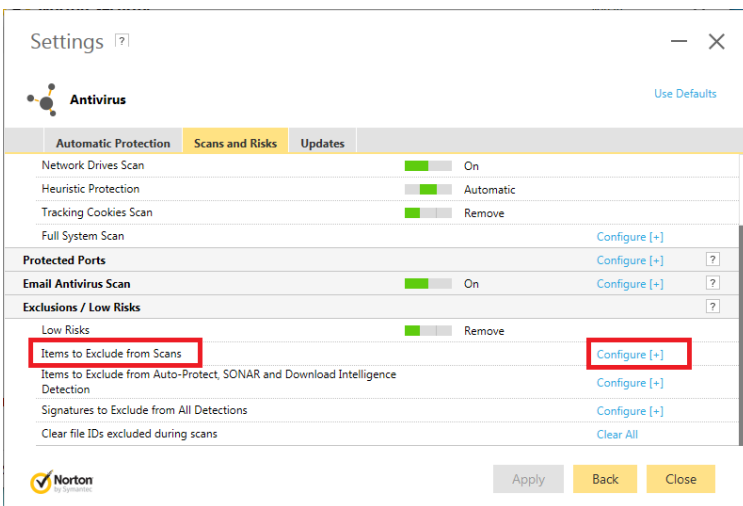

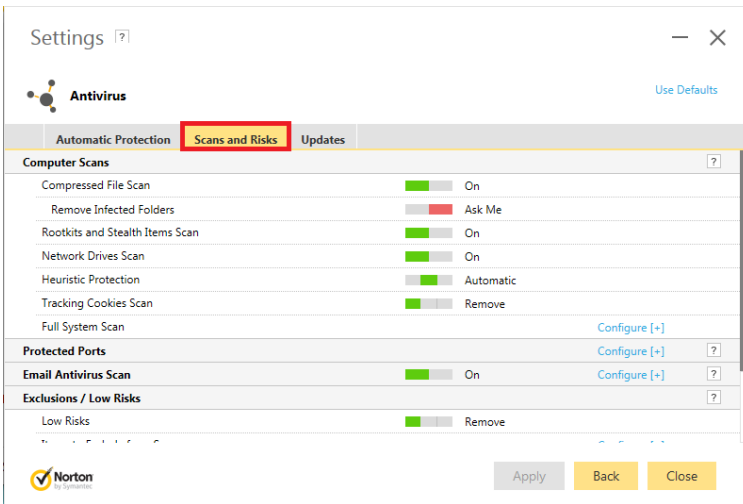

1. Open **Settings** in Norton Security Anti-Virus Software, by clicking the gear icon in the top right corner of the main window.

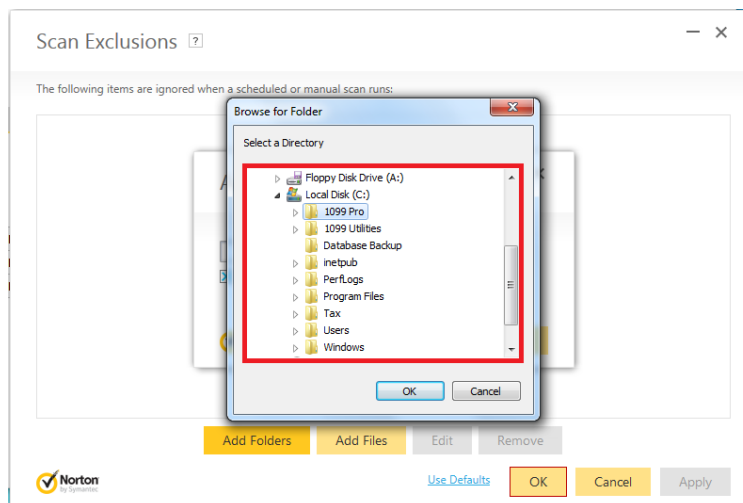

2. In the Settings window, click on the **Antivirus** settings tab.

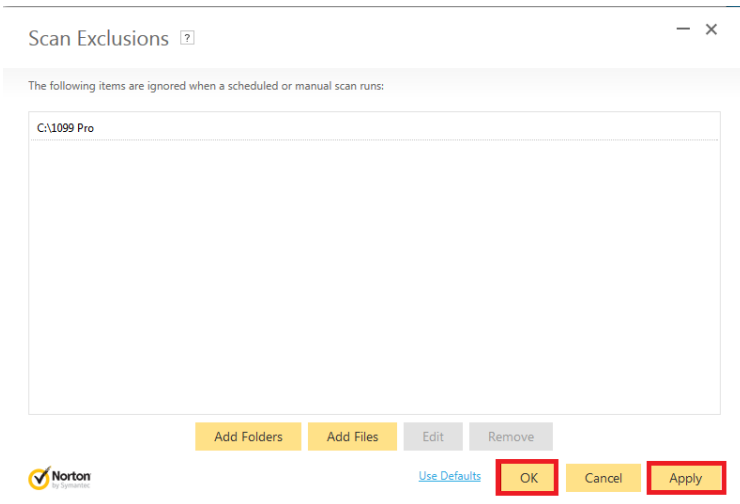

3. Next, select the **Scans and Risks** tab. Click the **Configure [+]** tab next to **Items to Exclude from Scans**.

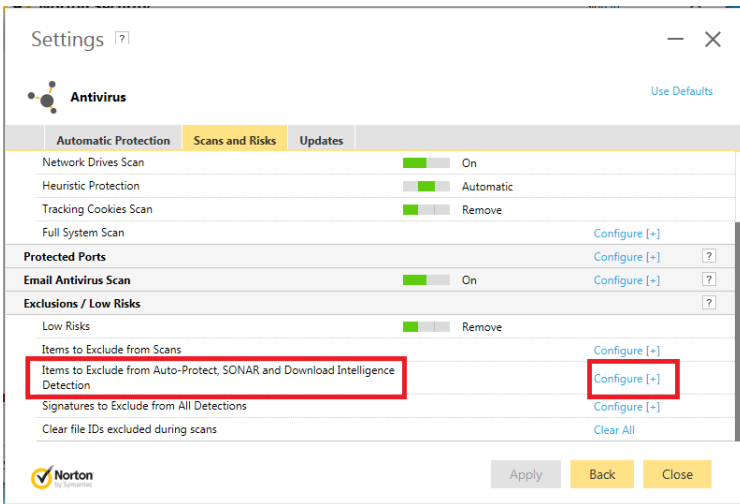

4. In the Scan Exclusions window, click **Add Folders**, then **browse** for the 1099Pro folder (C:\1099 Pro).

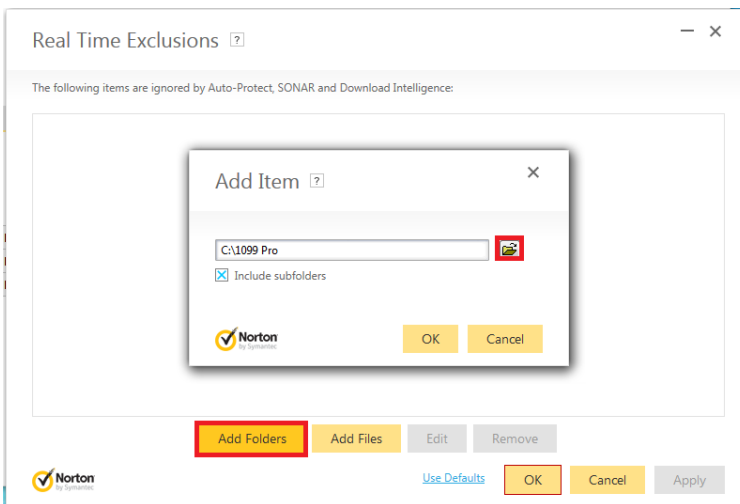

5. Select the 1099Pro folder, click **Apply**, and then **OK**.

6. Select **Configure [+]** for **Items to Exclude from Auto-Protect, SONAR and Download Intelligence detection**.

7. In the Real Time Exclusions window, click **Add Folders**, then **browse** for the 1099Pro folder (C:\1099 Pro).

8. Click on **Apply** to save the changes made to the settings. You will now see C:\1099 Pro in the list of items that are ignored by Auto-Protect, SONAR and Download Intelligence. Norton will no longer scan 1099Pro.
