CRS Pro v2019.18.19

Release Notes

UPDATED:

- Filing - Taiwan (TW) - XML Format changes to the DocRefID. For comprehensive details of considerations visit this link: Taiwan CRS special considerations.
    - DocRefID format requires the "D" to small caps "d" so it reads DocRefId .
    - File naming convention requires a sequenced, 7-digit number at the end of the docrefid.
        - TW Schema example: TW2019TW-12345678-2020-06-08-FI0000001

          CRS Pro example: TW2019TW-999888777-2020-06-17-AR0000000-0000001

          CRS Pro for TW docrefid needs the last group of characters to start with "FI" and the 7-digit sequenced number immediately following.
